

【高州離地の整備】

離地の雑草が大きくなった為、自然環境保全対応チームと管理職を中心に整備を10月6日に行いました。

当社OBのご厚意による耕耘機を使い、雑草刈と整地がある程度出来ました。

今後は枯草の処理と、奥の低地の修復を進めます。

We made up the ground (for environmental conservation activities).

Environment protection team and managers cut the grasses on October 6, 2011.

Because there had been weed-strew situation.

We used a tiller which was provided by the alumnus of UCHIYA.

We were mowing and leveling the ground to some extent.

After now, we will more dispose dried grasses and make up lower ground level at the back of the ground.
